

Chatbot using IBM Watson Assistant

Description:

Deploying a chatbot using IBM Watson Assistant for providing information about Electronics, Electronic devices and parameters involved in it. This document involves several steps, including creating an Assistant, defining intents and entities, configuring dialog flows, and integrating it into your application or website.

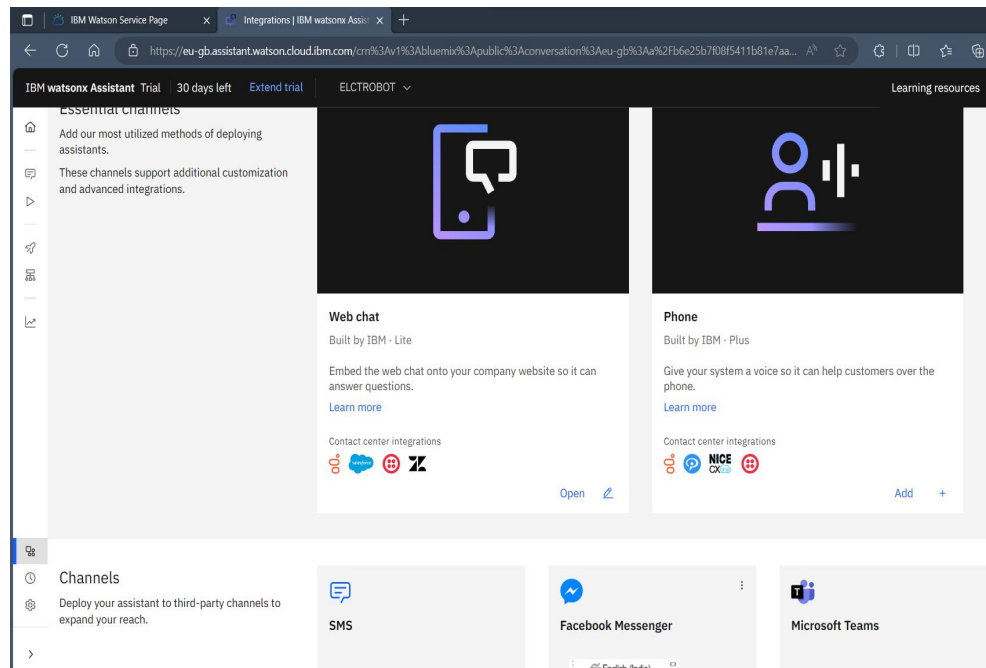

Here's a high-level overview of the process of Development part-2:

Step 1:

After adding intents and dialogues integrate your chatbot with facebook messenger. To integrate follow the below steps.

Step 2:

Integrate the Watson Assistant with facebook messenger: select the **Integrate** option at the left bottom of the watson assistant page.

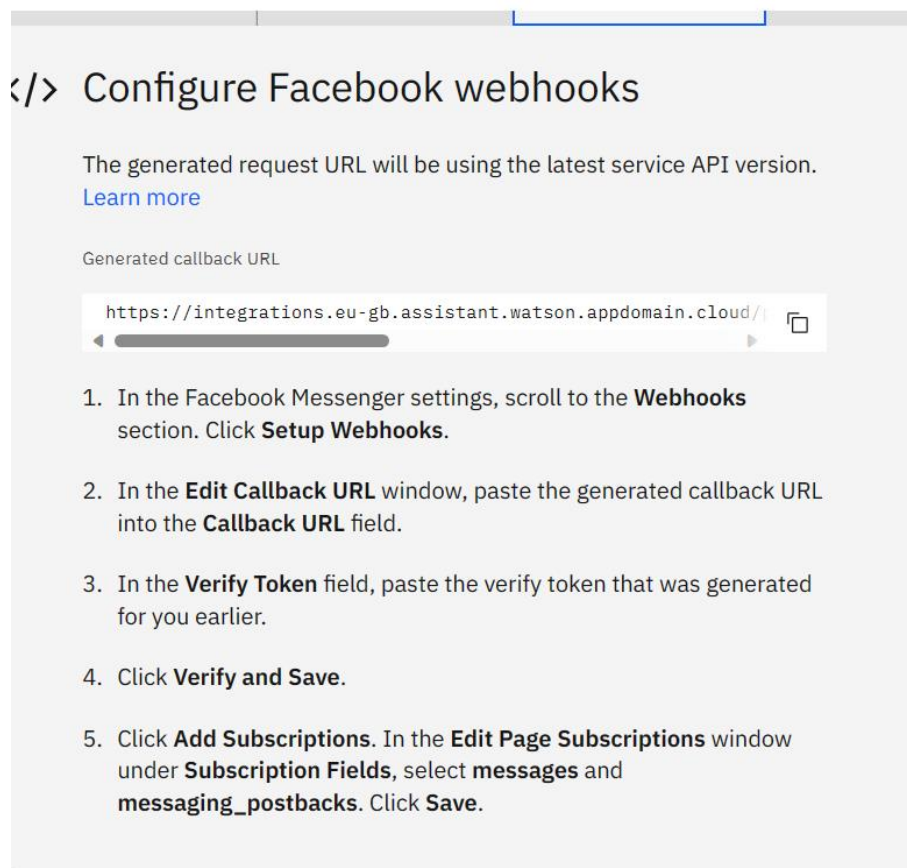

Step 3:

After creating facebook paste the secret ID in the required field or if you already have an account copy the ID from it and paste the ID.

Step 4 :

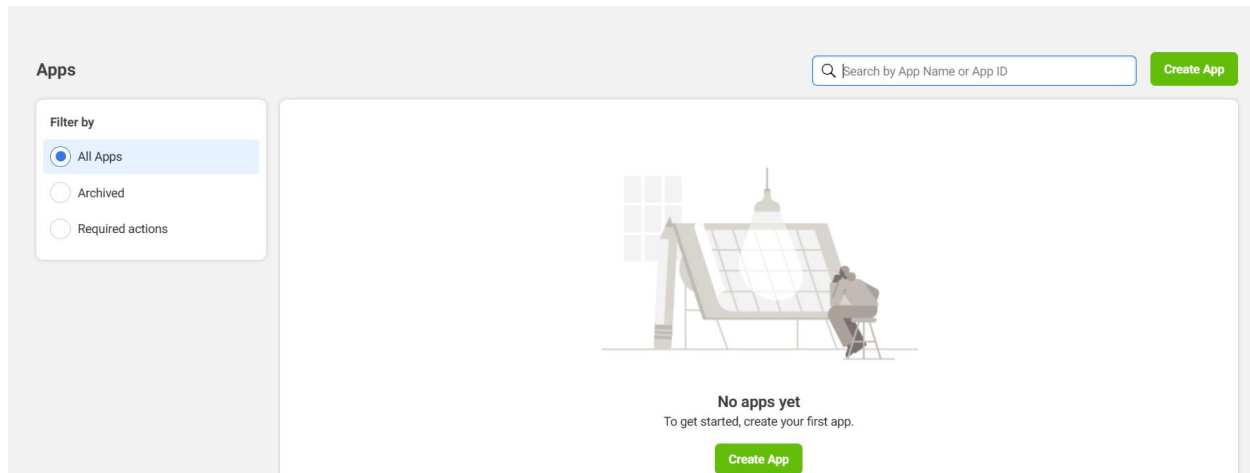

Configuring webhooks settings of facebook messenger, scroll to the Webhooks section.

- Click Setup Webhooks.
- In the Edit callback URL window, In the verify Token field paste the token .
- click the verify and save option

Step 5:

You can integrate Watson Assistant into your application or website using the Watson Assistant API. To integrate it into a browser application, you might use the Watson Assistant Web Chat widget or create a custom frontend by creating an new app

Step 6:

Fill the required credentials

[Docs](#)[Tools](#)[Support](#)[My Apps](#)

[use case](#)[details](#)

Add an app name

This is the app name that will show on your My Apps page and associated with your app ID. You can change the name later in Settings.

App contact email

This is the email address we'll use to contact you about your app. Make sure it is an address you check regularly. We may contact you about app policies, app restrictions or recovery if your app is deleted or compromised.

Business Account · Optional

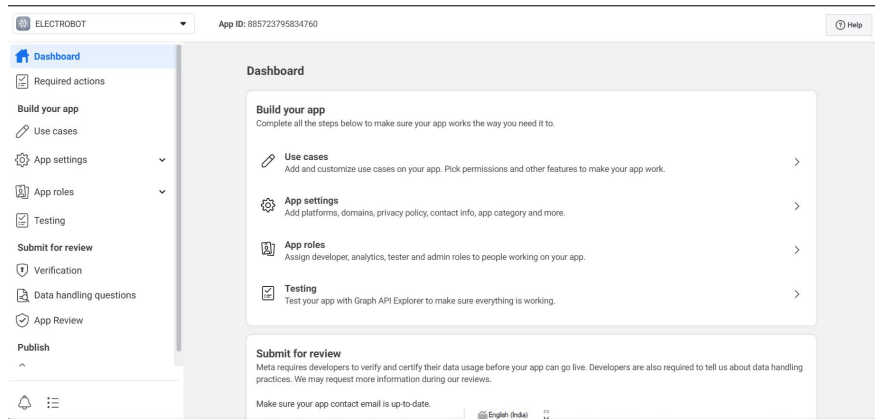

Connecting a Business Account to your app is only required for certain products and permissions. You'll be asked to connect a Business Account when you request access to those products and permissions.

By proceeding, you agree to the [Meta Platform Terms](#) and [Developer Policies](#).

[Previous](#)[Next](#)

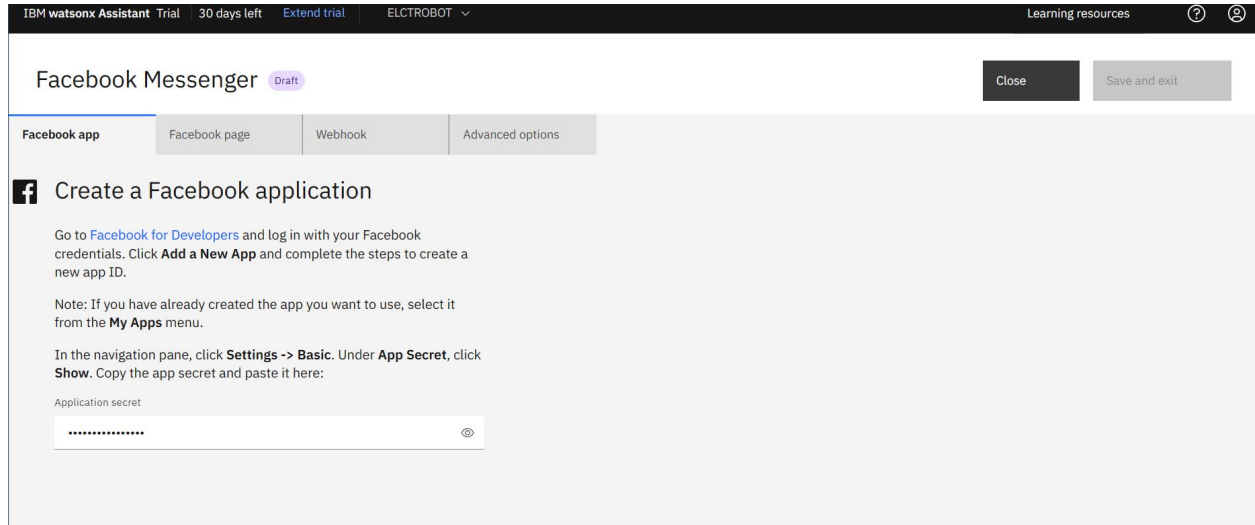

Step 7:

After saving the credentials the dashboard appears like this....

Step 8:

Choose the facebook messenger option in that page. Start integrating the chatbot with face book messenger .

Inside your Watson Assistant instance, Go to [Facebook for Developers](#) and log in with your Facebook credentials. Click Add a New App and complete the steps to create a new app ID.

Step 9:

Train the Assistant provided using the electronics oriented questions and answers by inserting phrases. This helps Watson understand user input better. Test the Assistant. Use the Watson Assistant's web interface to test your chatbot and refine its responses.

Thus this the development stage part-2 for creating the chatbot for Electronics sector....
